

FLORIDA ROBOTICS

Q3 | BIO

Q3 stands an impressive 63" yet weighs in at 110 lbs., making him nimble and able to fit into any space a human can. He sports a 22" touch screen and can display interactive media to showcase your brand, product videos, or event. **Plus, he has a built-in camera that takes real-time photos to email to your guests and clients on the spot!** Or enjoy the event, and we'll download and deliver them in a bundle post-show. Q3 is a bit of an influencer and loves having his picture taken, too. He's done many live chats with amused guests, robot-loving kids, executives, and others at home upon request!
